

# Interior Design 11

## Course Outline

Learn about the principles and elements of design as they apply to interior spaces. The course is a very practical, hands-on experience where you will learn to draft floor plans, prepare colour boards, plan to use space efficiently, and design a condominium to meet the needs of a specific client.

## Learning outcomes

- Understand the elements and principles of design, and be able to apply them to interior design
- Understand the properties of colour and how the use of colour affects our interior environment.
- Apply drafting, illustration, and presentation techniques in the designing of interior spaces to suit individual needs.
- Demonstrate an understanding of the various materials, processes, and technologies used in interior design.
- Develop the vocabulary appropriate to interior design in order to communicate their ideas effectively.
- Develop proposals for potential customers
- Explore career options

## Expectations

In order to achieve success in this course, each student will be expected to:

- Arrive on time with necessary materials to compete the day's work
- Attend all classes. Provide a signed and dated note from your parent or guardian explaining any absences or late arrivals.
- Complete all assignments and hand them in by the due date..
- Explore new ideas and develop new skills.
- Make good use of class time. Work quietly and efficiently.
- Work cooperatively
- Respect the work and opinions of others in the class. Learn by sharing ideas.
- Respect their environment. Maintain a clean and neat workspace. Return all supplies and equipment to their proper places.
- Enjoy yourself! Take pride in your work. Accept challenges

## Evaluation:

- Projects and assignments           60%
- Tests                                   20%
- Workhabits, time management   20%

*There is no fee, however this course may incur additional costs.*
