

Design a Condominium

Overview:

1. Design a condominium
2. Furnish the condo
3. Plan the colour scheme.
4. Using foam core, build a scale model of the condo
5. Do colour boards for each room
6. Furnish the condo (using foam core)

Specifics

Step 1: Design a 700 square foot condominium. You plan the shape (rectangular or square) and the dimensions to suit your needs and style.

Your condo must meet the needs of the following client.

- *female early 20's,*
- *student*
- *needs study space and computer*

Include:

- a kitchen
- an eating area
- a 3 piece bathroom
- private sleeping area (not necessarily an enclosed bedroom)

Step 2:

- Draft your floor plan using 1/2" scale.
- You will design the interior space to meet the needs of your client.

Step 3:

- Using foam core, build a scale model of your condo.

Step 4:

- Build furniture, cabinets, etc. to place in your model.
- You may use whatever materials you like to create your furniture, etc.
- Position your furniture in the model.

Step 5:

- Create a colour board for each room.
