Baking 11/12

Stop-Motion & Time Lapse Videos

For your e-portfolio, you will be creating a video using stop-motion animation, time-lapse photography or a combination of both. Adding multimedia to your blog can make your page more attractive and engaging.

The video will demonstrate how to make a component of the recipe such as making the dough, preparing the filling or shaping the product.

You will need to post the video with the recipe blog post on your e-portfolio. Ensure to describe in the post which component/steps of the recipe you have selected to make the video on.

- Length of video: At least 20 seconds minimum.
- Stop-motion animation, time-lapse photography or combination of both.
- Can be made during class or at home with any of the recipes for Term 3.
- Work with a partner.

Marking Criteria	Mark
Creativity - Are there additional elements such as attempt at making the stop motion look animated, music, or text?	/5
Execution - Does the video flow smoothly? - Is the filming well done? - Is the steps of the recipe understandable?	/10
Meet the following requirements: - At least 20 seconds long - Stop motion animation, time-lapse photography or a combination of both. - Posted with the recipe blog post by April 17 th with a description of the video.	/1 /1 /3
Total	/20
